

**Abstract of the Disclosure**

The present invention is a system and method of providing a repurchase facility for securities, bonds, and/or debt. The present invention is directed to a method for enhancing the liquidity of a tradable security, other than by an agency of Government trading in the Government security. The method comprises holding an issue of a security, determining when the security is being squeezed, and offering to the market a first portion of the holding during the squeeze to enhance the liquidity of the market for the security.
